

Who is Cash Flash

Cash Flash is a company that has developed a multi-service digital ecosystem based on its own Blockchain for the work needs of entities, institutions, companies, and individuals, guiding them towards digitalization.

This is achieved through the use of an intuitive multi-service platform with the assistance of AI, artificial intelligence based on Web3, and technologies developed by us, with the goal of:

Automating processes to save costs and time.

Improving customer management by offering them unique services that were previously unavailable. Increasing revenues.

Reducing management and administrative costs.

In doing so, Cash Flash has developed a unique and successful working method for growth.

Blockchain

Fast finality Blockchain Technology

Cash Flash has developed and assembled the best existing technologies and created futuristic ones that were previously non-existent. Our Blockchain serves as a unique, simple, and intuitive solution to support the creation of one's smart contracts with their own addresses or NFTs, enabling the initiation of new real-world projects for government entities, institutions, banks, and innovative companies.

With a very low transaction cost starting at \$0.01 per transaction, it is the most cost-effective blockchain in the world. Our decentralized technology allows for a calculation speed of 11,864 transactions per second, approximately 1 billion per day. Transactions are nearly instantaneous because our technology constantly pre-communicates the validation request for blocks with all available validators, which occurs simultaneously in real-time.

This results in an ultra-fast validation system with complete transaction security, recorded in an immutable and incorruptible ledger (even Cash Flash cannot intervene in the ledger and validated blocks). This ledger exists across many users and servers with Web 3 technology, making it virtually impervious to attacks.

Blockchain

Fast finality Blockchain Technology

Our infinite block validation technology achieves a block validation time of 2-5 seconds, based on Tendermint, Byzantine, Block, and Cash Flash technology, increasing Parallel Growth validators, meaning nodes operate in parallel, not vertically like other blockchains.

This technology surpasses common blockchains based on outdated funnel validation technologies that require analyzing each block for validation.

Furthermore, it uses minimal energy as it does not involve lengthy computation processes and obsolete block validation technologies found in other blockchains, making it carbon-free.

Cash Flash's blockchain, with its continuous commitment to research and engineering development of unique technologies, guarantees:

- ▶ Security
- ▶ Low transaction costs
- ▶ Low energy consumption
- ▶ Transaction speed significantly surpassing those offered by current blockchains or existing computer systems

Blockchain

Fast finality Blockchain Technology

We'll give an example

Today, interbank transfers take place through channels like SEPA and SWIFT, which are based on non-instantaneous technology and are therefore unsatisfactory. Consider a scenario where a company cannot load purchased goods until the payment arrives in their supplier's bank account, sometimes waiting for days: an intolerable bottleneck!

In the current situation, there is a slowdown in trade, lower GDP, reduced government revenues, and ultimately less global economic progress.

Today's economy requires the instantaneous movement of capital to facilitate the exchange of goods, create revenue, and drive economic growth. Cash Flash's Blockchain, with its unique technology enabling 11,684 transactions per second, low transaction fees, security, and speedy block validation, allows for all of this. Instant validation of capital and goods transfers.

Another qualifying factor is democracy: by also supporting the Support EWM technology, any user can have voting rights for updates and developments by the Cash Flash community.

Marketplace

Buy, sell, book anything

Cash Flash is the world's first company that is developing the most technologically advanced marketplace based on its proprietary Blockchain. At the same time, it will become the world's first marketplace to enable buying and selling in cryptocurrencies and digital assets, in addition to the current major fiat currencies €, \$, £, ¥, with the aim of offering the most exclusive, secure, advanced, and comprehensive service globally.

It's a total revolution in the digital business at your fingertips. Every distributing company that offers its articles and products can select and set their business preferences in their control panel to optimally reach desired markets using the artificial intelligence provided and developed by Cash Flash.

Every user can buy and sell certified services and products with a unique code of authenticity, which will be automatically tracked within Cash Flash's Blockchain to ensure the authenticity of purchased products, warranty, the raw materials used with geolocation, quality, spare parts, and the distribution chain. This means you can buy every item securely from certified sellers.

Marketplace

Buy, sell, book anything

Furthermore, every product purchased on the Cash Flash platform, equipped with its own barcode, QR code, or RFID labels, through Cash Flash's patented technology, will automatically be transformed into a unique code (unique and NFT) and tracked on the Blockchain. This blockchain will record the purchase, origin, and warranty of the product, ensuring its authenticity.

For fashion, luxury, electronics, and other products, the buyer will receive a purchase receipt by entering the unique code and secret code received via email, along with the certificate of authenticity and warranty containing their personal or company data. In the event of resale, the new owner can transfer ownership by generating a new secret code, printing a new certificate in their name, and all transactions will be automatically stored on the Blockchain.

This approach allows for sales to be conducted with total security, preventing scams, deception, or misunderstandings of any kind, providing a service equal to or better than notarization, quickly and essentially for free.

Cash Flash's RFID labels emit a frequency in MHz and transmit to the customer's mobile app, using a 256-bit military-grade encryption algorithm developed by us. This system makes counterfeiting and cloning absolutely impossible, ensuring the certainty of the purchased product.

Marketplace

Buy, sell, book anything

With Cash Flash, it's possible to purchase the following products within the marketplace:

- ▶ Supply of clothing and fashion.
- ▶ Furniture and home furnishings supply.
- ▶ Appliance supply.
- ▶ Watches and jewelry supply.
- ▶ Supply of diamonds or precious stones, both raw and certified (IGI, GIA, HRD, etc.).
- ▶ Supply of artwork and precious objects.
- ▶ Agricultural and construction machinery.
- ▶ Supply of construction materials and tools.
- ▶ Vehicles, including cars, trucks, motorcycles, boats, aviation, and their spare parts, all accessible with a simple click through a unique code.
- ▶ Maritime supply of refined and unrefined petroleum from 20 t tons to 250 tons, CIF or FOB to any coastal depot, fuel supply to your gas station or depot.
- ▶ Maritime supply of LPG to any coastal depot, supply to any gas station, etc.
- ▶ Supply of movies, music, school courses, apps, software, etc.
- ▶ Supply of any animals in compliance with the current regulations of your country and animal protection entities.
- ▶ Purchase of companies, industrial and civil real estate, land, etc.
- ▶ Electrical, gas, and water supplies, both civil and governmental,

Social Media

Connect with the world and start earning CFT

The Cash Flash social media platform is a powerful advanced platform with the assistance of A.I. that enables every person to:

- ▶ Showcase your personal or professional/business profile.
- ▶ Highlight your qualities and the services you want to offer.
- ▶ Connect people to the business or professional world.
- ▶ Facilitate the search for new clients and friends.
- ▶ Showcase your talent as an influencer by uploading your videos and earning CFT (Cash Flash Token) from advertising space based on your followers. You can also publish videos and photos for a fee, deciding which users can pay for your content.
- ▶ Exchange CFT for services.
- ▶ Establish a source of income and business inspiration with daily earnings based on the services you provide.

This extraordinary platform is complemented by numerous features including filters, special effects, and graphics that are useful for showcasing your talent and promoting any product.

Additionally, the encrypted "end-to-end" chat, calls, and video calls are conducted in a completely secure and unique manner, ensuring privacy and protection for users.

E-Bank

Wallet, Pos Credit Card Payment

A user-friendly and intuitive platform with multiple functions available for quick service in multi-currency and digital assets, complete with income and expenditure charts.

The platform allows for instant payments in all world currencies for both private individuals and businesses, who can also convert their Fiat currency into digital assets such as Crypto, including CFT (Cash Flash Token).

Users can request their personal debit card and IBAN in any currency, keeping their capital safe and easily accessible, and conducting global transactions independently.

NFT Platform

Buy, sell, create, register anti-fraud technology
certificate per NTFR, NTFD, NTFP, NTFC

Technology and platform NTF and CUD Unique Digital Code NFTs (Not Fungible Tokens) are digital assets that represent a real-world object; for example, a work of art can be registered and marked with an NFT in digital format that represents it.

As we have been able to ascertain, the current technology, although brilliant, is however incomplete and not 100% safe, as the community uses it promiscuously; therefore traditional NFTs will not be allowed as they are not sufficient to protect real needs.

NFT Platform

Buy, sell, create, register anti-fraud technology certificate per NTFR, NTFD, NTFP, NTFC

This is why Cash Flash launches a new technology based on a double certificate of uniqueness with CUD code where no other work or service can be cloned or copied. Our platform also launches a new revolutionary subdivision of NFTs by dividing them into:

1-NFT Real: real and existing physical good such as works of art, food, medicines, cars, houses, clothes, electronics, etc.; NTFR denomination.

2-NFT Digital: digital good such as software, digital works and anything that is marked in the virtual world such as in the Metaverse; NTFD designation.

3-NFT Payment: certified payment transactions such as bank transfers, checks, debits, payments; NTFP name.

4-NFT Certificate: any document that requires certification of authenticity and a certain date, such as notarial deeds, registered letters, company balance sheets, tax assessments, etc.; NTFC denomination.

NFT Platform

Buy, sell, create, register anti-fraud technology certificate per NFTR, NTFD, NTFP, NTFC

The Cash Clash NFT platform connected to the Cash Flash Blockchain will only allow the issuing and trading of NFTR, NTFD, NTFP, NTFC, which can be registered as property in the name of an individual or company.

Each NFTR, NTFD, NTFP, NTFC will be automatically linked to the product or service, showing the historical succession of properties, information relating to the product, its raw materials, taxes paid, eradicating counterfeiting and guaranteeing authenticity and uniqueness.

This is essential for countries that ban certain dangerous materials or substances, for example in food and medicines, which must be certified to guarantee their healthiness; the same applies to monetary transactions that eradicate money laundering and terrorist financing as required by internationally applicable rules.

The secret code CUD (unique digital code) is used to identify each product sold in the Cash Flash marketplace and to safely transfer ownership of the goods purchased. Each user will be able to register any of their goods or products on the platform in a simple and intuitive way, and will be able to sell it directly on the Cash Flash platform.

Metaverse

Explore the new digital world.
Buy, sell, trade

Cash Flash has developed a totally different concept from the current use that goes from gaming platforms to the sale of meaningless virtual properties.

Cash Flash's Real Metaverse offers exclusively real and functional services through a global 3D replica of land, properties and structures useful for making the purchasing experience more engaging; the virtual world with its own avatar has only aesthetic / experiential purposes but is based on a commercial concreteness to offer all the digital services useful for today's needs.

Every user, in any part of the world, will be able to enter the 3D representation of a truly existing shop, shop remotely having a real image of their person, take advantage of the advice of artificial intelligence, wear items of clothing by combining them with various solutions.

Metaverse

Explore the new digital world.
Buy, sell, trade

Or projects can be launched for small investors, such as the building development of land which is represented together with the properties of future construction, providing a 3D overview also useful to the bodies responsible for urban planning authorisations, while the design technicians (architect, structural engineer, thermotechnician, electrical designer, interior designer, etc.) will be able to work together on the project, sharing the solutions in real time. It can also be used by construction companies and suppliers to plan the quality, quantity and timing of supplies. Obviously the system can be used for other types of projects and investment platforms, having a clear understanding of its developments and final form.

Metaverso Real, thanks to its combination of powerful technologies and a unique and futuristic platform, creates a new real business method, currently non-existent, to allow every user to connect the real economy directly to the digital and virtual world. This extraordinary platform will offer many jobs and great opportunities to do business by working in a virtual world but actually operating for the real world, simplifying the development processes and difficulties of the real world.

Digital TV

Movies, Music, Programs

An extraordinary platform that allows all users to view the extensive public or private collections of individuals who wish to share their video collections to showcase their talent to the world.

There will also be a wider collection of movies and music available globally for viewing and listening with a simple monthly subscription, as well as newly released films in theaters.

The platform will also develop its own musical projects and film productions, often in collaboration with top influencers.

Business Accounting

Automated & Decentralized

A unique software for all global corporate accounting needs, seamlessly combining corporate accounting with an artificial intelligence engine developed by us in real-time, for:

- ▶ Issue digital invoices and digital transport documents (DDT) with the possibility of geolocation for each shipped product.
- ▶ Make payments to suppliers, taxes, and contributions, and handle any necessary compliance tasks.
- ▶ Perform historical data checks, such as historical purchase prices for raw materials, semi-finished goods, and assets, as well as transportation costs.
- ▶ Suggest alternative suppliers to save costs.
- ▶ Verify billing errors.
- ▶ Compare sales prices to competitors.
- ▶ Analyze products with higher margins and added value.
- ▶ Manage inventory.
- ▶ Monitor cash flows.
- ▶ Keep track of deadlines.
- ▶ Maintain up-to-date real-time balance sheets.
- ▶ Benefit from regulatory updates.
- ▶ Use a selection of graphical tools to keep your company under control.

Business Accounting

Automated & Decentralized

Cash Flash will market its own system that avoids the time and costs of making correct balance sheets and declarations, having a real-time, always updated view of the situation with feedback that allows you to detect errors and problem areas, making the necessary corrections in time to avoid unpleasant situations. unjustified situations or economic losses.

A flexible and highly customizable system made available with a simple monthly subscription.

Artificial Intelligence (AI)

An extraordinary combination of proprietary technologies developed by us, an exclusive in-house service that powers Cash Flash's multi-service platforms.

These technologies do not interfere with human decisions but, rather analyze the needs of individuals or businesses to provide advice for improved efficiency in terms of time and cost savings.

Mobile App

Technical support, media,
promote your product or company

The Cash Flash IOS and Android mobile app brings together the entire core business of the company in a single application that is indispensable for an increasingly demanding and advanced global economy that requires new concrete realities at the global service.

Cash Flash has explained above the development of its project, partly already completed and partly under development.

Cash Flash UAB is a Lithuanian joint stock company registered in Lithuania on 02-17-21
CODE: 305699952
Vilnius, Didzioji str. 18

Mobile App

Technical support, media,
promote your product or company

Cash Flash presents and illustrates below three platforms for experimental use capable of exploiting the technologies already partially created; reserves the right to cancel and remove these three platforms based on the Cash Flash blockchain, as they can only be active upon request from interested States that these technologies be put at the service of citizens and their governments also with external verification by an Entity impartial.

At the moment Cash Flash has not been authorized by any government to develop these three technologies.

01

Payment of taxes

Company accounting filing
of balance sheets, notarial deeds

A platform that allows you to pay taxes, contributions, duties, state and local payments, and in general any necessary company payments, being able to use your CFT Cash Flash Tokens to be able to quickly carry out any obligations.

02

Political elections

Decentralized Voting

Political Elections was born as an experimental platform at the service of Governments, Bodies, institutions, and private polls, with the aim of putting an end to any problem of uncertainty and voting security in elections, and of drastically reducing the costs of voting.

In every political campaign there are risks of serious human errors, from counting ballots to possible electoral fraud, with votes contested by the loser.

Cash Flash has developed a highly technological and safe tool: every person eligible to vote in possession of an electronic passport equipped with an electronic chip will be able to cast their vote from the Cash Flash app, placing their passport on the phone and voting only once time.

In countries where there are no electronic passports, it will be possible to use the available KYC systems and technologies and other options approved by the Authority.

Using the technologies developed by Cash Flash, each vote will be secret and authentic, marked with a certain location, date and time, and an identification video that compares the user with the photo of the document and cross-references the data with all the ballot papers issued. It is the most efficient and technological system ever created that offers civil society the necessary democratic security.

03

Digital processes

Decentralized Civil
and
Criminal processes

Put an end to the large bureaucracy caused by an excess of sentences impossible to compare and process quickly, in order to have a short, impartial and fair trial.

The judge and magistrate will have a series of elements to quickly analyze the parties, the Thema decidendum, the documents of the case, the similar previous sentences, being able to communicate with the parties via videos and writings at any time, without waiting for the long times of the hearings.

The parties will be able to respond in writing and via video, upload documents.

By being able to follow the trial remotely, it will be possible to expand the number of judges, especially for the most difficult cases, in order to avoid obvious distortions in sentences.

Introductory summary

For the development of the system, a utility token called Cash Flash (CFT) will be issued.

Through this currency, it will be possible to obtain goods and services within the system.

Furthermore, it will be possible to change the token within the exchanges, pay within our marketplace and use it as a means of payment in all stores, both online and offline, participating in the system.

Holders of Cash Flash tokens will also be able to exchange them among themselves.

The Cash Flash token is issued and circulating on the Cash Flash blockchain and on the ETH ethereum blockchain having a single official address.

The details of the token issuance

The ETH and Cash Flash smart contracts have in both smart contracts 10 billion units equivalent to 10 billion Cash Flash tokens indicated with the symbol CFT.

The initial smart contract was created on the ethereum blockchain; after the development of its own blockchain, the smart contracts were combined with a Bridge to allow those who owned CFT-ETH to use their token also on the Cash Flash ETH-CFT blockchain; Both the **Etherium** and **Cash Flash** chain contracts in beta remain official.

(ETH) `0xbAd58fF429C580dBa6Fa0a2E8d2296F4FCd38A3e`

GENERAL NOTICE - LEGAL INFORMATION

In the legal part you will find a detailed description of the rights and obligations associated with tokens, the terms and conditions for exercising these rights and the risks associated with token issuance.

Cash Flash is based on the ETH and CFT protocol therefore, any malfunction, unplanned function or unexpected operation of the protocol may cause the Cash Flash network to malfunction or function unexpectedly.

Additionally, the native protocol account unit can lose value similarly to Cash Flash, and in other ways as well. **Cash Flash assumes no responsibility in this regard, except in cases of willful misconduct or gross negligence directly attributable to the company.**

REPRESENTATION AND WARRANTIES

**By participating in the ICO placement,
the buyer accepts the above and, in particular, declares and guarantees
that:**

Have read carefully and fully understood and accepted the terms and conditions associated with or attached to the WhitePaper, consenting to their content and agreeing to be legally bound by them.

Have sufficient knowledge of the nature of cryptographic tokens, possess significant experience and functional understanding of the use and complexities related to managing cryptographic tokens and currencies, as well as blockchain-based systems and services.

Be authorized and have full power and capacity to purchase Cash Flash.

Not be a U.S. citizen, resident, or entity (U.S. person) or purchasing Cash Flash tokens on behalf of a U.S. person.

Reside in a tax and legislative jurisdiction that allows the purchase of tokens through an ICO placement without requiring any local authorization and be compliant with local, state, and national laws and regulations when purchasing, selling, and/or using tokens.

Be familiar with all related regulations in the specific jurisdiction they are based in, and that the purchase of cryptographic tokens in that jurisdiction is not prohibited, restricted, or subject to any additional conditions.

Not use the tokens for illegal and/or suspicious activities, including but not limited to money laundering and international terrorism financing; the purchase and holding of tokens will not constitute a violation of any applicable law in the buyer's country of residence or citizenship.

Purchase Cash Flash tokens because they desire access to the Cash Flash Technology platform, not for purely speculative investment or use.

www.cashflash.io

APPLICABLE LAW - ARBITRATION

Applicable Law - Arbitration: The documentation of the tokens, the Cash Flash ICO operation, and the purchase of Cash Flash tokens must be governed and interpreted in accordance with the law.

The parties agree to seek an amicable solution before taking any legal action.

Any dispute or controversy arising from or under the ICO placement will be resolved through arbitration in Lithuania in accordance with the rules of international arbitration in effect at the date when the arbitration notice is submitted in accordance with these rules.

The seat of arbitration will be Lithuania, and the arbitration proceedings will be conducted in Lithuania.

Cash Flash does not constitute, nor should it be considered, an offer of securities in any jurisdiction.

This White Paper does not include or contain any information or indication intended as a recommendation or solicitation on which to base any investment decision.

This document does not constitute an offer or invitation to sell shares, securities, or rights related to Cash Flash and/or affiliated or associated companies.

Cash Flash tokens are utility tokens intended for use exclusively on the Cash Flash platform and are not intended to be used as investments.

The offer of Cash Flash tokens on a trading platform is made to enable the use of the Cash Flash platform, not for speculative purposes.

The offer of Cash Flash tokens on a trading platform does not change the legal qualification of the token, which remains a simple means for using the Cash Flash platform.

Cash Flash should not be considered as a legal, tax, or financial advisor.

All information contained in the white paper is provided for general information purposes only, and Cash Flash provides no warranty regarding the accuracy and completeness of such information and reserves the right to modify or remove any information or design elements that it deems not beneficial to the company.

Due to the lack of cryptographic qualifications in most countries, it is strongly recommended that each buyer conduct a legal and tax analysis regarding the purchase and ownership of Cash Flash based on nationality and place of residence.

Cash Flash is not a share or certificate of participation and does not confer any right to participate or vote in the general assembly of Cash Flash.

Anyone who commits to acquiring Cash Flash (CFT) tokens should be aware that the Cash Flash business model, white paper, or terms and conditions may change or need to be modified due to new regulatory and compliance requirements of any applicable law in any jurisdiction, even retroactively.

In such a case, buyers and anyone acquiring Cash Flash tokens acknowledge and understand that Cash Flash will not be held liable for any direct or indirect losses or damages caused by such changes.

Cash Flash will do everything possible to initiate its operations, develop the Cash Flash platform, and/or provide the services outlined in this White Paper.

Investing in a public token offering, as defined under Article L. 552-3 of the Monetary and Financial Code, involves risks of partial or total loss of the investment.

There is no assurance of liquidity for the tokens purchased during the offering, the existence of a secondary market for such tokens, the value of tokens acquired during the offering, and the equivalent value of these tokens in foreign currency. The tokens do not constitute financial instruments under Article L. 211-1 of the Monetary and Financial Code and confer no rights other than those described in the information document.

Additionally, the regulatory framework applicable to the offering and tokens, as well as the tax regime applicable to the holding of tokens, may not be defined in some jurisdictions yet.
